Beach Replenishment - October 2015 - April 2016

Beach replenishment will add 320,000 cubic metres of sand to the beach between Bournemouth Pier and Southbourne.
Replacement of groynes - Phase 1

Thirty groynes will be replaced over the next five years starting in autumn 2015 until 2020. Each year the work is scheduled for autumn, winter and spring, avoiding the summer season.
Replacement of groynes - Phase 2

Fourteen groynes will be replaced between 2021 and 2026. Each year the work is scheduled for autumn, winter and spring avoiding the summer season.
Replacement of groynes - Phase 3

Fifteen groynes will be replaced between 2027 and 2032. Each year the work is scheduled for autumn, winter and spring avoiding the summer season.
