

Service Plan 2018/19

Community Learning and Commissioning

1. Service Scope

What does the Service Unit do?

Community Learning & Commissioning Services (CLC) has an enabling role, ensuring service users, parents, pupils and the wider community have access to high quality, value for money provision. Through effective commissioning, based on sound local intelligence and national best practice, service quality is continuously improved, whilst costs are minimised.

CLC works at a Borough wide strategic level to ensure sufficiency of education provision for pupils requiring a mainstream or specialist school place. The service also fulfils the statutory admissions and home to school transport functions of the Council. The quality of all education provision is monitored closely and challenge and support is provided as required to drive up standards.

Strategic Special Educational Needs (SEN) services clearly set out the Councils policies in relation to support for children with additional needs. These services are then delivered through the Education Psychology and specialist SEN teams working in partnership with schools and other providers such health. The Virtual School team focuses on supporting Looked After Children (LAC) in education working closely with colleagues in Children Young People and Families.

The Dorset Combined Youth Offending Service (DCYOS) operates at a pan-Dorset level and is led by Bournemouth through CLC. The DCYOS works in partnership with other groups to prevent offending and reduce re offending by young people across the county.

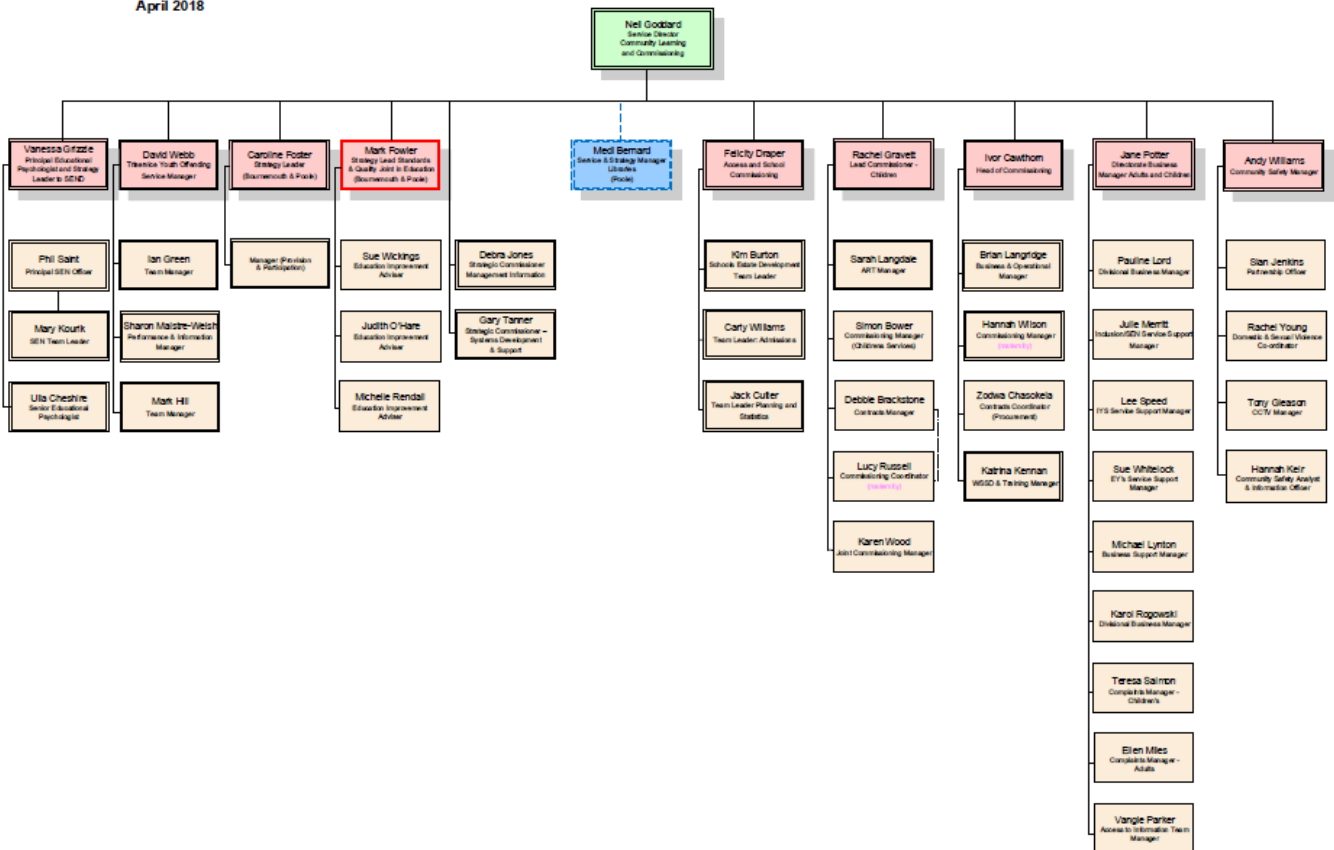

The Bournemouth Libraries are now delivered through a shared service with the Borough of Poole. CLC represents Bournemouth in the governance arrangements of this service and ensures that work of the Libraries continues to support the coherent delivery of services by the Council. The Councils support of pan- Dorset archive services are also administered through these arrangements.

CLC fulfils the Council's statutory duties in respect of providing strategic leadership and management relating to the Community Safety Partnership functions for Bournemouth, and manages the Town's public spaces CCTV system. The Community Safety team supports the Partnership in respect of the delivery of its strategic plans and delivery plans, ensuring other council and partner services focus on those priority issues agreed strategically as requiring action

The service also has a key role in supporting the wider Adults and Children's Directorate through effective business support functions, the development and governance of partnership arrangements, the provision of high quality information and data analysis, the planning and delivery of capital projects and support for the directorates use of ICT.

How are we organised?

Community Learning & Commissioning
April 2018

What are our key risks and assumptions?

- Increased demand for SEN support and the increasing complexity of those needs has led to significant pressure on the availability of budget and provision. In order to meet demands resources must be targeted and providers supported in delivering increased capacity. If this is not achieved the Council will have to address a significant budget pressure and may not be able to meet its statutory duties in relation to SEN.
- The delivery of commissioned services is reliant on an effective market that can deliver sufficient capacity to meet needs. In commissioning care services, for Adults and Children, the Council is proactive in working to develop market capacity and quality. However, issues such as the shortfall in suitably skilled and qualified workforce are difficult to address in the short to medium term and can limit the availability of local services and drive up costs.
- Partnership working is key to maintaining and improving services when available resources are reducing. Ensuring partners maintain commitment to this way of working and understand the benefits it delivers to the public-sector system as a whole is key. A loss of focus on a partnership approach would significantly impact on the delivery of all services.
- Almost all schools in Bournemouth are now academies and the resources available to the Council to support schools has significantly reduced. The Council remains committed to working with schools and national and regional bodies such as the Schools Commissioners to drive up standards. In order to achieve this a new set of arrangements is being developed that will enable

to the Council to challenge and support where required but puts greater emphasis on a school-led system. This is a significant change the outcome of which is not as yet clear.

- Reducing levels of funding mean all services having to prioritise investment and ensure efficiency. At the same time, key statutory and non-statutory functions must be delivered and coherence across services maintained. Ensuring the pace of change continues to reflect the rate of reduction in available resources becomes ever more challenging. This is exacerbated by increased demand for services and increasing costs.
- The increasing complexity and vulnerabilities of adults with multiple health and social care issues has led to significant pressure on the availability of budget and provision. In order to meet demand resources must be targeted to areas where the greatest impact will be delivered and providers supported in delivering services to a highly complex cohort of individuals. If this is not achieved the Council will have to address a significant budget pressure to Adult Social Care whereby individuals in the 40-50 age range will have the health and social care needs of individuals usually in their 70 – 80's.

A risk register for CLC services is maintained and can be accessed on request.

What were our key achievements last year?

- CLC delivered, either directly or through commissioning on behalf of other services, significant savings that contributed to the delivery of a balanced budget for the council. This was achieved at a time of reducing resources and structural change. Outcomes were maintained, and in many areas improved, and services were targeted and redesigned to meet identified needs.
- A new shared service was delivered for Library services across Bournemouth and Poole. This brought together the administration of the 22 Libraries across the conurbation. A single streamlined staffing structure was implemented and savings were delivered. No libraries were closed, opening hours were not reduced and specialist services maintained.
- Effective investment of capital resources supported the delivery of services. The final phases investment in Primary schools to accommodate increased pupil numbers were completed successfully on time and within budget. A new Social Care facility was created at Coastal Lodge to replace out dated facilities elsewhere and create expanded provision to support service users in recuperating before returning to their own homes.
- A new Home Care service was commissioned that increases capacity and provides greater control of costs. This work was undertaken in partnership with Borough of Poole and has been successfully implemented at a time when pressure on services has been increasing.
- The SEN team has completed all statutory assessment with the statutory 20 week timescale. This has been achieved at a time of significant change, with the introduction of Education Health and Care Plans (EHCP), and increasing workloads as demand for assessment increases. The team is also on track to complete the transfer of Statements of Educational Need to EHCPs by end of March 2018 deadline. Bournemouth is likely to be one of very few Councils to achieve these targets.

- Educational outcomes for Children in Bournemouth continued to improve at Key Stage 4 and outperformed regional and national comparators. Good progress was made in other Key Stages and by disadvantaged children who achieved in line with the national average for their group.
- Information and data analysis is key to all aspects of the Council's work. Significant improvements have been made in the quality of data available and the way that this is presented and used to support service improvement.
- Focused work on the recruitment and retention of Social Care staff has reduced the need to employ interim staff and reduced costs. A rolling recruitment programme has reduced the time between a vacancy occurring and a new member of staff being appointed and raised Bournemouth profile as an employer of choice in the region.
- A pan-Dorset Protocol to Reduce the Criminalisation of Children in Care has been implemented. This was recognised as best practice at national level by the Howard League through the presentation of an award.
- Investment has been secured to replace and upgrade key elements of the CCTV system in Bournemouth. CCTV has proved effective in reducing level of crime and supporting the identification and prosecution of perpetrators where crime does occur.

Public Health

Local authorities have a legal duty to improve health and wellbeing of residents and to reduce inequalities in health between them under the Health and Social Care Act 2012. Bournemouth Council's Ambition 2020 Corporate Plan, sets out a clear priority reflecting this legal duty (AC3 – improving health and wellbeing and reducing inequalities for residents).

CLC contributes to the Council fulfilling this duty in a number of areas. The Community Safety Team work in support of services to address domestic abuse and the regeneration of Boscombe and West Howe. The Drugs and Alcohol Commissioning Team work with public Health colleagues in taking a strategic lead in the development and implementation of the recovery and support services in Bournemouth.

The safeguarding in education team provides advice and guidance for schools and settings which contributes to robust practices that keep children and young people safe. CLC has led on the integration of health visiting and school nursing services in Bournemouth. The DCYOS has integrated health resources that support the work of the team and provide comprehensive health assessments and care planned interventions for mental health, substance misuse, sexual health and physical health and liaise with other health services

Staff Performance

Staff performance is managed through the Councils published Annual Appraisal Conversation process. This requires an annual performance assessment with a six monthly review. This sets the context for less formal but more frequent performance management through team and individual meetings throughout the year. The implementation of this policy is monitored at a service unit level and staff have the opportunity to feedback through formal and informal routes as required.

In the most recent Staff Survey, completed in 2015/16, the business unit once again performed extremely well. An action plan was created based on these outcomes and this has now been implemented. Progress is monitored through full service unit meetings and ongoing feedback.

2. What are our key activities in 2018/19?

The activities that follow help us to deliver the priorities set out in Bournemouth Council's Ambition 2020 Corporate Plan. The activities also support our Equality and Diversity objectives and our Climate Change strategies.

What are the business as usual activities we deliver?

Table A
