## Explanatory Notes

Population totals may differ due to different population base (check age groups included).

Communal Establishment residents excludes staff and their families.

A dependent child is any person aged 0 to 15 in a household (whether or not in a family) or a person aged 16 to 18 in full-time education and living in a family with his or her parent(s) or grandparent(s). It does not include any people aged 16 to 18 who have a spouse, partner or child living in the household.

Social Grade is the socio-economic classification used by the Market Research and Marketing Industries, most often in the analysis of spending habits and consumer attitudes. Although it is not possible to allocate Social Grade precisely from information collected by the 2011 Census, the Market Research Society has developed a method for using Census information to provide a good approximation of Social Grade.

Each individual aged 16 or over is assigned the approximated social grade of their Household Reference Person, according to standard market research practice.

The age range for this table has been restricted to 16 to 64. The approximated social grade algorithm used in the census produces results for this age range that are consistent with those from other data sources. The information collected in the census produces less accurate results for those outside of this age range and therefore will not be made available.
