Key	Statistical robustness
CV <= 5%	Estimates are considered precise
CV > 5% and <= 10%	Estimates are considered reasonably precise
CV > 10% and <= 20%	Estimates are considered acceptable
x = CV > 20%	Estimates are considered unreliable for practical purposes
.. = disclosive	
: = not applicable	
- = nil or negligible

a Employees on adult rates whose pay for the survey pay-period was not affected by absence.

b Figures for Number of Jobs are for indicative purposes only and should not be considered an accurate estimate of employee job counts.

KEY - The colour coding indicates the quality of each estimate; jobs, median, mean and percentiles but not the annual percentage change.

The quality of an estimate is measured by its coefficient of variation (CV), which is the ratio of the standard error of an estimate to the estimate.
